Stockport Council's Public Health Services uses information about pupils for research and statistical purposes, to monitor the performance of local health services and to evaluate and develop them. This particularly includes information from School Nursing services including immunisation and NCMP (National Child Measurement Programme). The statistics are used in such a way that individual pupils cannot be identified from them. Information on the height and weight of individual pupils may however be provided to the child and its parents and this will require School Nurses and Public Health Services to maintain details of pupils' names and demographic information for this purpose, for a period designated by the Department of Health following the weighing and measuring process. Pupils' information will be provided by Stockport Council to the School Nurses. Public Health Services may also provide individual schools and LAs with aggregate information on pupils' height and weight.
